Compatible ReSound Smart Hearing aids

Many ReSound Forte models work with the ReSound Smart 3D™ app. If you’re in doubt, please ask your hearing care professional.
### Compatible mobile devices

**Apple**: ReSound Smart Hearing aids support Made for iPhone (MFi) functionality with the following Apple devices:

<table>
<thead>
<tr>
<th>iPhone 7 Plus</th>
<th>iPad Pro (12.9-inch)</th>
<th>iPod touch</th>
</tr>
</thead>
<tbody>
<tr>
<td>iPhone 7</td>
<td>iPad Pro (9.7-inch)</td>
<td></td>
</tr>
<tr>
<td>iPhone 6s Plus</td>
<td>iPad Air 2</td>
<td></td>
</tr>
<tr>
<td>iPhone 6s</td>
<td>iPad Air</td>
<td></td>
</tr>
<tr>
<td>iPhone 6 Plus</td>
<td>iPad mini 4</td>
<td></td>
</tr>
<tr>
<td>iPhone 6</td>
<td>iPad mini 3</td>
<td></td>
</tr>
<tr>
<td>iPhone SE</td>
<td>iPad mini 2</td>
<td></td>
</tr>
<tr>

<td></td>
</tr>
<tr>
<td>iPhone 5c</td>
<td>iPad (4(^{th}) generation)</td>
<td></td>
</tr>
<tr>
<td>iPhone 5</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

iOS 10 or later is required. Always install the latest version of iOS for best performance. For use with Apple Watch, watchOS 3 or later is required.

**Android**: The ReSound Smart 3D app supports some of the most popular Android devices.

As we are continuously making more mobile devices compatible, please consult the ReSound Smart 3D app website for up-to-date compatibility information: [www.future-resound.com/compatibility](http://www.future-resound.com/compatibility)
Pair with your iPhone, iPad or iPod touch

How to pair your ReSound Smart Hearing aids to your iPhone, iPad or iPod touch

Check battery
Insert a fresh battery in your ReSound Smart Hearing aid. Keep the battery door open so the hearing aid cannot power up.

Turn on Bluetooth
Swipe upwards from the bottom of the screen to reveal the Control Center.

If the Bluetooth icon is Gray, tap it to turn on Bluetooth. The icon should be blue to indicate that Bluetooth is on.
Detect hearing aids
Now that Bluetooth is activated, go to Settings, tap General, then Accessibility.

Close the battery door to power up your hearing aid so your iPhone, iPad, or iPod touch can detect it and then tap Hearing Devices.
Make the connection
Tap on the name and model number of your hearing aid when it appears on the screen.

When it’s connected, your hearing aid name will be shown with a checkmark, and the color of the name will change from black to blue.

Tap Pair in the dialogue box. When pairing to two hearing aids, you will receive separate pairing requests. The second request may take a few seconds to appear.

Wait for authentication
When you tap on Pair in the dialogue box, your ReSound Smart Hearing aid and Apple device need time to authenticate the pairing. Either put your hearing aid on and wait for a series of 6 beeps followed by a ripple tone, or wait at least 120 seconds for authentication to finish. Please don’t stream audio until authentication is complete.
Now that you are connected, you can check the status of the connection on the Hearing Devices page.

Pairing to more than one Apple device
You can pair up to five different Apple devices to your ReSound Smart Hearing aids, but you can only connect to one Apple device at a time.

To switch connection from one Apple device to another, swipe up from the bottom of your Apple device’s screen and turn Bluetooth off.

Now you can activate Bluetooth on the device you want to connect to next.

Re-connecting your hearing aids to your iPhone, iPad or iPod touch
When you turn off your hearing aids or Apple device, they will no longer be connected. To connect them again, turn on your hearing aids by opening and closing the battery doors. The hearing aids will then automatically connect to your Apple device. You can also verify this connection by accessing the Accessibility shortcut (triple click the home button) and making sure that your hearing aids have been detected.
Stream sound directly to your ReSound Smart Hearing aids

You can stream stereo audio, such as music, directly from your Apple device to your hearing aids.

Control Center

Access the Control Center by swiping up from the bottom of the screen. Swipe left to access the second panel. Select the device for audio - in this case your hearing devices.

To stop streaming to your hearing aids and return to normal phone operation, select iPhone. You can also stop streaming audio to your hearing aids by tapping the media player’s pause button.
How to stream audio from different apps

You can also stream audio from other apps such as YouTube.

Open a media player app such as YouTube and press the AirPlay icon.
Select the hearing aids for streaming and press play. Press pause to stop streaming the video. If you want to go back to normal iPhone operation, click on the AirPlay icon and tap on iPhone in the dialogue box.

Phone and FaceTime calls

If a call comes in while you are streaming audio from your music player, answer it and the system will automatically turn down the music and switch to your phone conversation.

Once you end a call, the system will continue streaming music from where you left off.

If I answer a call from Apple Watch, do I get the sound in my hearing aids? If you get a call on your Apple Watch, scroll down on the digital crown and choose Answer on iPhone to get the sound in your hearing aids. Use the microphone on your iPhone to pick up your own voice.
Audio routing

Audio Routing allows you to control how different audio inputs will be directed.

Go to Settings, tap General, tap Accessibility, then Audio Routing.

Select either: Call Audio (incoming phone calls) or Media Audio (for example streaming music).

Select how you wish to direct the audio input, for example Always Hearing Aids.

Setting to Automatic routing will route to a wired audio source if connected, then search and stream to either standard Bluetooth devices (for example CarPlay, A2DP Bluetooth devices) or hearing aids.
Control of your hearing aids built into your iPhone, iPad or iPod touch

How to access basic volume and program controls
Triple click on the Home button on your Apple device to access basic volume and program controls.

How To use Apple’s native app to control your ReSound Smart Hearing aids
You can also access a control center for your hearing aids in Settings. Go to Settings, General, Accessibility, and Hearing Devices then tap on the hearing aid name to go to the hearing-aid controls.

1. The name, model, and battery status of your hearing aids.
2. Streaming and volume settings for both hearing aids or independently for each hearing aid.
3. Independent volume control of each hearing aid.
Scroll down the page to see the following settings.

4. View and change the program.

5. Start and stop Live Listen to use your iPhone, iPad or iPod touch as a microphone which sends sound directly to your hearing aids.

6. Tap this if you want to forget this device and remove the pairing.
Smart control and personalization with the ReSound Smart 3D app

Download and install the ReSound Smart 3D app
The app can be downloaded for free on the App Store or Google Play by following these steps:

If you have an iPhone, iPad or iPod touch:
1. Go to the App Store
2. Search for “ReSound Smart 3D”
3. If you are on an iPad, change the search criteria in the top left-hand corner to iPhone only
4. Tap on Get and then Install to start downloading the app
5. Tap the ReSound Smart 3D app on your Home screen to open your ReSound Smart 3D app

If you have an Android device:
1. Go to the Google Play Store
2. Search for “ReSound Smart 3D”
3. Tap on Install, then Accept so the app can access certain features on your phone such as Bluetooth
4. When installation is complete, tap on Open to open your ReSound Smart 3D app
Getting connected

The first time you open the app, it will take you through a few steps to get you connected. Start by accepting the Terms & Conditions and then continue with the flow shown here.

If you have an Apple device:
If you haven’t already paired your Apple device with your hearing aids, please go to p. 6 and follow the steps to pair.

If you have an Android device:
Pair your Android device to your hearing aids:

Take off your hearing aids.

Reboot the hearing aids (open and close the battery doors).

Place the hearing aids close to your mobile device.

Remember to allow push notifications and use of location-based services to always stay up to date and enjoy the app fully.
The ReSound Smart 3D app will guide you through the rest of the flow:

When you have paired in iOS Settings or done your first pairing on Android, the app will confirm that it has found the hearing aids.

The next step is to establish a secure connection between the app and your hearing aids. You do this by rebooting your hearing aids. This is the second time if you have an Android device.

When the green check mark appears, you’re ready to go!
ReSound Smart 3D app overview

The ReSound Smart 3D app has four main screens, all accessible from the bottom navigation menu.

Home screen
The Home screen is your center for control. From here you have easy access to program and sound control.

You can always return to this screen by clicking the Home icon in the bottom menu.

Connectivity
The connectivity screen will show you information about the connectivity between your mobile device, hearing aids, ReSound wireless accessories and Apple Watch.

Low-battery warnings will also be displayed here.
My ReSound

My ReSound is about you and your hearing aids.

More

The More menu is where you adjust general app settings and find support and legal information.
Program change

The ReSound Smart 3D Home screen gives you direct access to change programs and Favorites in three convenient ways:

Top menu
Swipe to the left for all programs and Favorites.

Program overview
Pull down or tap on the handle below the top menu to view all programs and Favorites.

Quick swipe
Swipe on the red card to change programs. This view of each program also displays available Quick buttons.

Program overview
When opening the program overview, you can see all your programs and Favorites. You can change and edit programs and also add Favorites.
Hearing aid volume control

Volume control
Move the slider to adjust the volume in the hearing aids.

Mute
To instantly mute the sound coming from your hearing aids, tap the mute icon to the left of the volume slider.

Independent volume control
To adjust volume for right and left hearing aids independently, tap the split icon to the right of the volume slider. Sliders for each hearing aid appear.
Streamer volume control

When a streamer program is selected, you can adjust the streaming volume separately with the orange volume slider.

Hearing aid volume
You can independently adjust the volume of the hearing aids without affecting the volume of the audio you are streaming.

Independent streamer volume control
To adjust volume for right and left sides of the streamer device independently, tap the split icon to the right of the orange slider.

Can I mute all my devices?
You can mute your hearing aids or your streamer device independently by tapping on one of the mute icons to the left of the volume sliders. To unmute, re-tap the mute icon or tap on the card in the middle of the screen.
Quick buttons

Each program has individual Quick buttons. Quick buttons are shortcuts to instant sound optimizations when you need them.

Quick buttons are displayed on the red card just below the program name.

In the All-Around program, Noise filter and Speech clarity are available.

Tapping a Quick button will activate it until you tap it again to deactivate it.
Sound Enhancer: personalize your sound

Sound Enhancer lets you fine-tune bass, middle, treble, Noise reduction, Speech focus and Wind noise reduction.

The adjustments available in Sound Enhancer vary per program depending on your fitting. Noise reduction, Speech focus and Wind noise reduction are only available for some models of ReSound Forte.
Access Sound Enhancer from the bottom of the Home screen.

Here is a view of Sound Enhancer with all possible features shown.

Move the sliders to interact with each feature and make adjustments.

When you interact with one of the features, the screen will focus on that feature alone. See next page.

Tap Reset to return to fitted settings.
Bass, middle and treble
Increase or decrease bass, middle and treble frequencies.

Adjustments are also applied to streamed sound.

Noise reduction
Adjust the level of noise reduction from full awareness of surroundings to focused hearing.

Can I save my settings?
When you find settings you like, you can save them as Favorites. If you don’t save them, the adjustments will remain until you reboot your hearing aids (opening and closing the battery doors).
Wind noise reduction
Adjust and reduce wind noise for maximum listening comfort in windy situations.

Speech focus
Choose exactly what to listen to by adjusting the focus of the beam.

When the hearing aids are set to automatic focus, adjusting Speech focus will switch them to manual setting. To return to automatic use, slide to the far right.

Optimize Speech focus
When adjusting Speech Focus, also try the Noise reduction for maximum effect.
Favorites

Add a Favorite
You can save your preferred sound settings as a Favorite.

Tap Add a Favorite at the bottom of the Sound Enhancer or the program overview.

Changes made to sound settings can be saved as a new Favorite or to update an existing Favorite.

Name
Start by naming your Favorite.

What are the settings of my Favorite?
To view the settings of your Favorite, tap Summary at the bottom of the screen. You can do this when you add the Favorite or if you enter Edit mode.
Location
You can also choose to add a location to a Favorite.

You can choose to have your hearing aids automatically change to the Favorite when you enter that location.

Favorite overview
When you have saved your Favorite, it will be added to the program navigation menus.

To edit or delete an active Favorite, tap Edit at the bottom of the program overview. Then tap the Favorite. Edit name, location or tap Delete at the bottom of the screen.

To delete all your Favorites, simply tap Delete all Favorites at the bottom of the program overview after you tap Edit.
Connectivity

Connection and battery status

Connection status
Shows the connection status between your hearing aids, streamer device and mobile device. If you have an Apple Watch connected, that will be shown too.

If you see a red line with an exclamation mark, it means the connection is missing or broken.

What if I lose a connection?
When a connection is lost, tap the exclamation mark to receive guidance on how to re-establish the connection. It is a good idea to check that your hearing aids are powered on, are within range and have enough battery power. You can also open and close the battery door if connection is not re-established right away.
Bluetooth off
Bluetooth must always be on to use the app with the hearing aids. If it is turned off, the app will guide you to turn it on.

Low-battery warning
If the battery on one or both of your hearing aids is running low, a red battery will show next to the hearing aid(s).
Guiding tips

The ReSound Smart 3D app offers Guiding tips to help you get a better hearing experience. The Guiding tips pop up in the app during the first weeks of wearing your hearing aids and using the app. It’s your choice if you want to receive Guiding tips – the app will ask you.

Experienced hearing aid user
If you are an experienced hearing aid user, you will receive the Guiding tips on use of the app.

These tips will highlight different features in the app, if you haven’t already used them.

Tap ‘Got it’ when you’ve read the tip. Tap ‘Don’t show tips’ if you don’t want any more Guiding tips to be shown.

New hearing aid user
If you are new to wearing hearing aids, or would just like to know more, you will receive Guiding tips for use of the app as well as general hearing guidance.

Tips on general hearing guidance include advice about getting used to wearing hearing aids and what you can do to achieve the best result.
Learn about the app

To learn even more about how the app works, go to ‘Learn about the app’ in the My ReSound menu. Explore the app, and what you can do, section by section.

Overview
The full list of items that you can explore to learn more about the app.

Example:
Changing programs
Learn how to change programs by swiping on the cards on the Home screen.
Find my hearing aid

If you have lost your hearing aids, go to My ReSound and tap on ‘Find my hearing aid’. The app can help you locate them.

Last location
The map will show where the hearing aids were last seen connected to the app. Tap the hearing aids to see address and time they were last seen.

You can switch between Map and Satellite views.

Search nearby
If the app detects the hearing aids nearby, it will show you if you are getting closer or farther away from your hearing aids. Look for the indication on the red bars at the bottom of the screen.

Hearing aids must be on to use this feature.
More

Additional app options

Application: App customization

1. Demo mode: view the app without being connected to hearing aids.
2. Guiding tips: turn on or off.
3. Auto-activation of favorite locations: Choose if you want your Favorites to automatically change to the locations you saved.

Legal information

1. Information about legal manufacturer, app version number etc.
2. Terms and conditions for use of the app.
3. Privacy policy.

General info

1. About: Read about the app and the ReSound brand
2. Legal information: See next screen
3. Support: Find tips and links for further support
ReSound Smart 3D app for Apple Watch

Control the smartest hearing aids straight from your wrist.

What you need
The ReSound Smart 3D app must be installed on your iPhone. Please follow the instructions found in the Apple Watch companion app on your iPhone.
How to get the ReSound Smart 3D app on your Apple Watch

How to get the app on Apple Watch

- Open the Apple Watch app on your iPhone.
- Scroll down until you see ‘Smart 3D’ in your list of apps. Tap it.
- Enable ‘Show App on Apple Watch’.
- You will see the ReSound Smart 3D app become available on your Apple Watch.

More menu

- When your Apple Watch and iPhone are paired, further Watch settings are accessible from the More menu.
- Sound Enhancer features should be specifically enabled in this menu in order to see them on Watch.
Enable “complications”

- You can also use ReSound Smart 3D app ‘complications’. These are small control icons shown on the main Apple Watch screen. They will show your current program, and will take you directly to the app with a simple tap.

- You can enable complications by customizing the Apple Watch face. This is initiated via a long press on the Watch face and by choosing “customize”.

- The small square areas are complications. Select one complication and use the slider to navigate to the ReSound complication icon.

You can also use the Apple Watch digital crown for volume adjustments when on the Home screen. In streamer programs, tap the streamer bar to adjust that with the digital crown.

Home screen

The Home screen shows you the current program.

Programs and Favorites

Program overview

Swipe right from the Home screen to see program overview. Tap one of the program icons to choose a program. Scroll down to choose between hearing aid programs, streamer programs and your own Favorites. You can create new Favorites in the ReSound Smart 3D app on the iPhone.
Volume control

Hearing aid volume control
Tap the + or - icons to increase or decrease the volume of the hearing aid.
To mute/unmute the hearing aids, force touch on the screen.

Streamer volume control
When a streamer program is selected you can adjust the streaming volume separately with the orange volume slider. You can also mute/unmute the streaming volume by force touch.

Quick buttons and Sound Enhancer

Swipe left from the Home screen to find Quick buttons and Sound Enhancer.
Adjust all Sound Enhancer features by tapping the + and - icons. Use force touch to reset to fitted settings.

Comfort in Noise

Comfort in Wind

Speech Focus

Bass and treble
Stream sound to your Android phone

Stream from your Android phone to your ReSound Smart Hearing aids using the ReSound Phone Clip+

When paired and connected to the ReSound Phone Clip+, your Smart Hearing aids can stream stereo sound from your Android phone.

Simply open a media player on your phone and press play. Your hearing aids will switch to the streaming program and after a few seconds you will hear audio.

Pairing your ReSound Phone Clip+ with your Android phone

- Go to the phone settings and make sure that Bluetooth is turned on
- Turn on the Phone Clip+, remove the silver cap, and locate the small blue Bluetooth pairing button
- Tap the button once to activate the Bluetooth pairing mode. The LED indicator will turn blue and the Phone Clip+ will be in Bluetooth pairing mode for 2 minutes
- After a few seconds, select Hearing Aid Phone from the list of available Bluetooth devices on your phone
- If asked for a passcode, enter 0000 (four zeros) and then select Headset
Pairing your ReSound Phone Clip+ to your hearing aids

- Open the hearing aid battery door
- Turn on the Phone Clip+, remove the silver cap, and locate the small white hearing aid pairing button
- Tap the button to activate the hearing aid pairing mode. The LED will blink yellow every 2 seconds and the Phone Clip+ will be in pairing mode for 20 seconds
- Close the battery doors on your hearing aids

For further information about the ReSound Phone Clip+ refer to the user guide, instruction video or visit www.future-resound.com

ReSound Control™

Download the ReSound Control app* if you are using wireless ReSound hearing aids with a Phone Clip+.

The app enables you to change programs and adjust volume.

*Dependent on local availability.
